DETAILED ACTION

In a response of 12/15/04 to a restriction requirement of 10/6/04, applicants elected Group I claims 1-10 without traverse.

Claims 11-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/15/04.

Claims examined on the merits are 1-10.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "white liquor waste" is uncertain as to meaning and scope. This term does not appear to have an art recognized meaning, and it would be uncertain as to waste that is white and not white.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1651

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5 Claims 1, 3-6 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al (AQ on PTO-1449).

The claims are drawn to a composition containing a thermolabile protein, which can be an enzyme, admixed with a liquor waste, which
10 can be a sorghum liquor waste. The enzyme can be phytase as disclosed in the specification.

Chen et al discloses improving the thermostability of phytase by mixing the phytase with sorghum waste liquor.

The mixing of phytase with sorghum waste liquor as disclosed by
15 Chen et al results in a composition that is the same as presently claimed.

Chen et al appears to have been published in 2001 prior to 3/1/01. If not, it is a reference under 35 U.S.C. 102(a) since Tsung-Yin Tang is an inventor, but is not an author resulting in the
20 authorship of the Chen et al being different from the inventive entity of the present application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

25 (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter
30 pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al in view of Cory (4,077,842).

Claims 2 and 7 additionally require the composition to be dried. Cory discloses producing a dried stabilized enzyme composition. For example, see claims 14 and 15.

It would have been obvious to dry the mixture of phytase and sorghum waste liquor disclosed by Chen et al to make the mixture more storage stable and reduce volume for transportation as suggested by Cory drying a stabilized enzyme composition.
